

Year 6 news

Term 5, Week 5

A snapshot of our week

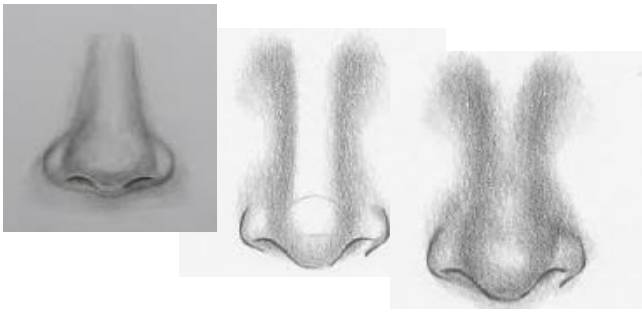

Bright spark: Steph
Stars: The whole class!

WELL DONE!

SATs week is now over and we are so proud of all the children in Y6. You have worked so hard this week, well done! You showed great motivation, determination and perseverance. We could not have asked any more of you. Now relax and enjoy your weekend!

Art:

The children worked on their sketching skills this week. They were drawing detailed noses.

PE:

In PE, we played rounders. The children enjoyed a very competitive game - the difference in the total scores was only 3 points! They showed great team spirit and were supportive of each other. Well done all!

Year 6 festival:

Pictures from the festival will be included in next week's newsletter.

Science:

This week, we looked at evidence for evolution. First, we recapped vocabulary associated with this unit: adaptive traits, evolution, characteristics, inheritance and natural selection.

We then recapped the fossilisation process. A special well done goes to **Tyler** - who knew more than Mrs S-B! In addition to looking at fossil evidence of animals, we looked at the fossilisation of fern leaves. We studied similarities and differences of fossils and their living relatives.

Next week:

Monday 20th May - Whole class transition session with Mrs Miller

Tuesday 21st May - DT/Science day - children to wear own clothes - not best clothes as we will be using paint and glue guns.

Wednesday 22nd May - Bubble/Colour run - PM. We are representing Sweden so children are welcome to wear blue and yellow - but they do not need to!

Woodland Learning:

The children had a lovely session with year 5. They played games and made a variety of things using the tools.

Italian:

The children revised numbers to 1000. They practised through conversation and through a fun game.
