

Year 6 news

Term 2, Week 6

A snapshot of our week

Bright spark: Harry
Stars: Jessica & Josh B

English

The children wrote a descriptive piece about an older gentleman looking back on fond memories, whilst playing a beautiful melody on his beloved piano. The children had to think carefully about how to structure this piece and how to effectively show the reader the feelings of the older man, as he reminisced about important events in his life. They showed great determination and perseverance and I am very proud of their efforts to include higher level punctuation and vocabulary.

History:

We had an amazing Zoom lesson on Tuesday with Samantha from The National Holocaust Centre. The children were polite and engaged throughout. They were confident *answering* (some very tricky) questions and they were awesome at *asking* really sensible questions. The session involved some researching and was very thought-provoking.

Science:

This week, we learnt about how the blood transports nutrients, oxygen and water around the body. We learnt about the different food groups and how the food is broken down and transported through the body. The children then worked in groups to create a piece of drama explaining the process.

Maths:

We have been multiplying and dividing fractions this week. The children quickly learnt how to multiply fractions and they remember how to divide fractions by using, KCF - keep, change, flip. Great work everyone!

PE:

We did circuit training in PE. The children worked with great determination and perseverance!

World War II day:

We loved the children's dressing up for World War II day. Please see pictures below.
