**Key Resources**

**Key Vocabulary**

<b>Password</b>	A secret word, phrase or combination of letters, numbers and symbols that must be used to gain admission to a site or application such as a website.
<b>Internet</b>	A global computer network providing a variety of information and communication facilities, consisting of interconnected networks and computers.
<b>Blog</b>	A regularly updated website or web page, typically one run by an individual or small group, that is written in an informal or conversational style.
<b>Concept map</b>	A diagram that shows how different objects or ideas are related and connected.
<b>Username</b>	An identification used by a person with access to a computer, network, or online service.
<b>Website</b>	A set of related web pages located under a single name.
<b>Webpage</b>	A page online that makes up one screen of a website.
<b>Spoof website</b>	A website that uses dishonest designs to trick users into thinking that it represents the truth.
<b>PEGI rating</b>	A rating that shows what age a game is suitable for.

**Key Questions**

<b>What is a password and why should we keep them safe?</b>	A password is a secret word or phrase that allows a user to access a website. Passwords are like toothbrushes in that they should not be shared with anyone else.
<b>Is everything I read on the Internet true?</b>	Just because something is on the Internet doesn't mean that it is true. Some people create spoof websites that pretend to be something else such a bank website or to provide misleading information.
<b>How do I know if I am old enough to play a computer game?</b>	Computer games, like films, are often not suitable for children. PEGI ratings will show how old a person must be to play a game.
