Term Six Week Three

Maths

The children have now started our final topic of time. The children first made their own clocks, they were working in pairs and were asking each other to show an o'clock and a half past on their clocks. We drew our own clocks for the different times of the day - Worship at 9 o'clock, break at half past 10, lunch at half past 12 and home time at quarter past 3. We are going to do more learning of quarter past and quarter to next week, along with recapping the minutes. Any extra learning at home on this topic would also be greatly appreciated.

English

We have taken a little break from our Flat Stanley topic to complete English related SATs. We have so far done our Spelling, SPaG and Reading Papers. The children are dealing with this really well after a bit of a wobble on Tuesday morning. We spoke to the children to discuss their worries and also reassured them that they just need to try their best. We will hopefully have completed and marked all of the papers by the time we have our transition meetings and can discuss the outcomes.

Flat Stanley has still been travelling the globe, he's made it to Taiwan, and Canada this week!
