

Year 5 Newsletter

27th May 2022

Dear Parents

This week in maths, the children have learnt to measure acute and obtuse angles using a protractor, which is quite a tricky skill to learn. In English, they wrote excellent newspaper articles and play scripts. Our geography work focused on climate and biomes and in science, the children found out about Jane Goodall and her work with chimpanzees.

On Wednesday, we had a DT morning, when the children created the musical instruments that they had designed. I was really impressed with the independence that the children showed and the end results were impressive - all the children made instruments which looked good and played at least three different sounds. We used our instruments to create a rainforest composition!

Teacher of the Week

This week, I was so impressed with Reece's 'teacher of the week' presentation. He taught the class all about planes, reading the presentation he had made really clearly. The children certainly enjoyed the challenge of his word search.

Woodland Learning

I have probably said it before, but I absolutely love doing Woodland Learning with this class. We had another great session yesterday, with all the children happily playing together. We baked apples over the fire and simply had a lovely time. Many thanks to Mr Upton, Mrs Shed and Mrs Sherrell for helping out.

Dates for Woodland Learning next term :

Friday 17th June and Friday 1st July

Hamper Donations

*Just a reminder, that the PTFA would like hamper donations by 10th June.
For Year 5, white items have been requested, please.*

I hope you all have a great week off.

Best wishes,

Louise Grinstead
